

5. The water is to be diverted from its source at the following point SE ¼ SE ¼ Section 5, T.9N., R.64E., M.B.D. & M. or at a point from which the N ¼ corner Section 5, T.9N., R.64E. M.D.B. & M. bears N25°09'00"W 5511.24.' See map filed with Application No. 75779.

Describe as being within a 40-acre subdivision of public

survey, and by course and distance to section corner, If on unsurveyed land, it should be so stated.

6. Place of use ..... See attachment

Describe by legal subdivision. If on unsurveyed land, it should be so stated.

7. Use will begin about ..... January 1 ..... and end about ..... December 31 ..... of each year.  
Month and Day Month and Day

8. Description of proposed works (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) Diversion structure to Homestead Reservoir: water will be diverted from the well head of the Homestead Well by a 2" underground pipe to a 6" valve located at the spillway pipe of the Homestead Dam. See attachment for diversion structure from Homestead Reservoir.

State manner in which water is to be diverted, i.e. diversion structure,

ditches and flumes, drilled well with pump and motor, etc..

9. Estimated cost of works \$5,000.00.....

10. Estimated time required to construct works: two (2) years.....  
If well completed, describe works.

11. Estimated time required to complete the application of water to beneficial use: five (5) years.....

12. Remarks: For use other than irrigation or stock watering, state number and type of units to be served or annual consumptive use.

8. Description of proposed works:

Water will be stored in the Homestead Reservoir. Improvements to the Homestead Dam and Reservoir have been completed.

Diversion structure from Homestead Reservoir: Water will be diverted from the Homestead Dam and Reservoir by a 6” valve located at the spillway pipe of the Homestead Dam to 2” gravity fed underground pipe to stock water tanks at various locations within the proposed place of use described in section 6, above. The water proposed to be distributed to the various stock water tanks will be installed with float devices to control waste.
